Visual Signal 1.3
Introduction

Kevin Tseng
AnCAD, Inc

Outline

- The Platform Concept
- Operation in Visual Signal

The Platform Concept

1. A Signal Processing Platform
   - Module Plug-in Architecture
   - License-Controlled Features
2. Domain-Specific Applications powered by Visual Signal
   - Joint-Development with Third Parties

The Visual Signal Platform

Professional Modules: 1D Basic, HHT, 1D Extended, Statistics

Plug-in Modules: DAQ, Finance, SVM, Matrix, MMPF, Enhance

Visual Signal Platform: BatchRun, Macros, ExternalAPI, Container, License Manager, Module Loader

License Files

Operation Process

1. Import Data
2. Processing Algorithm
3. Regulate Properties
4. Result Display
5. Explain and Analysis

Operation Enviroment

下拉式選單 (Pull-Down Menu)
元件操作拖拉視窗 (Network Window)
視覺化繪圖視窗 (Visualization Window)
元件參數設定視窗 (Properties Window)
